ABORIGINAL AND TORRES STRAIT ISLANDER LAND FUND ACCOUNT STATEMENT OF REVENUES AND EXPENSES YEAR ENDED 30 JUNE 2003

The *Land Fund and Indigenous Land Corporation (ATSIC Amendment) Act 1995* provided for the establishment of the Aboriginal and Torres Strait Islander Land Fund (Land Fund) and the Indigenous Land Corporation (ILC) under a new part 4A of the *Aboriginal and Torres Strait Islander Commission Act 1989* (ATSIC Act).

The Aboriginal and Torres Strait Islander Commission (ATSIC) is required to keep accounts and prepare financial statements for the Land Fund under section 193H of the ATSIC Act. The Minister for Immigration and Multicultural and Indigenous Affairs must cause an annual report to be prepared about the administration of the Land Fund under section 193I (1) of the ATSIC Act.

The ILC has distinct and quite separate reporting responsibilities, which are detailed in the Functions and Powers of the Indigenous Land Corporation section of this report.

PURPOSE OF THE LAND FUND

The Land Fund is to be built up to become a self-sustaining capital fund by 30 June 2004. It is to provide a secure and ongoing source of funds to the ILC to provide economic, environmental, social and cultural benefits for Aboriginal and Torres Strait Islanders by assisting in the acquisition and management of an Indigenous land base.

BACKGROUND

Following the High Court's recognition in June 1992 of the concept of native title at common law (the 'Mabo' judgement), the Government of the day legislated to protect native title rights under the *Native Title Act 1993* in December 1993.

\$200 million was allocated to the Land Fund in 1994-1995 as an interim measure under Part 10, Clause 201 of the *Native Title Act 1993*. As the specific legislative arrangements of the Land Fund had not been established, the Department of the Prime Minister and Cabinet was given responsibility for investing this allocation under the interim arrangements.

The *ATSIC Amendment (Land Fund and Indigenous Land Corporation) Bill 1994* was presented to Parliament in June 1994. The Senate supported the amended Bill - now called the *Land Fund and Indigenous Land Corporation (ATSIC Amendment) Bill* - on 21 March 1995. The Act came into effect on 1 June 1995.

With the commencement of the Act, Part 10, Clause 201 of the *Native Title Act 1993* was repealed and balances held under the interim arrangements were transferred to the new Land Fund. Responsibility for managing Land Fund investments was transferred to ATSIC.

LAND FUND APPROPRIATIONS

From 1995-1996 until 2003-2004 (Category A years), the Commonwealth Government each year will appropriate \$121 million (indexed to 1994 values) to the Land Fund. Approximately 63 per cent will be invested to build the capital base of the fund. The remaining 37 per cent will be administered by the ILC for its statutory land acquisition and land management responsibilities and for associated costs. The allocations will be indexed so as to maintain their value in real terms.

In 2004, Government allocations to the Land Fund will cease and in later years (Category B years) the ILC will receive the realised real return on investments of the fund in the previous year. By this time it was envisaged that the capital base would be sufficient for the annual earnings to replace the Government appropriation making it a perpetual fund.

The Land Fund itself, however, will remain the property of the Commonwealth.

The eighth special appropriation of \$143,997,000 took place on 2 July 2002, with \$53,553,000 being provided to the ILC. An amount of \$90,444,000 was invested in securities in accordance with section 39(10) of the *Financial Management and Accountability Act 1997* (FMA Act).

In the 2003-2004 financial year the ninth and last special appropriation of \$146,695,000 will be drawn down with \$54,713,000 being for the ILC.

STRUCTURE OF THE LAND FUND

From 1 January 1998 the Aboriginal and Torres Strait Islander Land Fund became a Reserved Fund within the Commonwealth Public Account. From that date monies placed in the Land Fund must be invested in accordance with section 39(10) of the *Financial Management and Accountability Act 1997* (FMA Act).

A further amendment to the FMA Act, constituting the replacement of the Reserved Money Fund by Special Accounts, took effect on 1 July 1999. The Financial Management Legislation Amendment Act 1999 converted the Land Fund Reserve to a Special Account under section 20(1) of the FMA Act on 1 July 1999. As a consequence, the Land Fund Reserve became known as the Land Fund Account.

The Land Fund and its investments are administered by ATSIC under delegation from the Minister for Finance and Administration under section 39(10) of the FMA Act and in compliance with the Delegation of Power to Invest Fund Balances or Drawn Money detailed in the ATSIC Chief Executive Instructions.

CONSULTATIVE FORUM

The Minister for Immigration and Multicultural and Indigenous Affairs appoints a Consultative Forum on the investment policy of the Land Fund (Consultative Forum). This is a Committee through which the nominated ILC Directors and other appointees of the Minister can discuss investment policy of the Land Fund with the Delegate of the Minister for Finance and Administration.

The Consultative Forum, which met on two occasions in 2002-2003, consists of the Delegate, at least two nominated ILC Directors and such other persons the Minister considers appropriate.

The members of the Consultative Forum for 2002-2003 were:

Paul Barrett	Chief Finance Officer ATSIC Delegate of the Minister for Finance and Administration
Shirley McPherson	Chairperson ILC
David Baffsky	Director ILC

PERFORMANCE INDICATORS

On 1 July 2002 the balance of the Land Fund stood at \$1,095,203,524.

On 2 July 2002 an amount of \$90,444,000 was appropriated to the Land Fund providing a base investment of \$1,185,647,524 (excluding accrued interest). The realised real return for the year 2002-2003 was 7.03 percent per annum on the revalued portfolio (including reserves and receivables). This is based on an inflation indexation factor of 1.70% as determined under section 193D (1) of the ATSI Act and has been arrived at following the Australian Investment Management Association guidelines on performance standards.

Schedule of calculation of real return on 2002-2003 Land Fund Account:

Assets as at 1 July 2002	\$1,095,203,524
Add special appropriation 2 July 2002	90,444,000
Assets as at 2 July 2002	\$1,185,647,524
Assets as at 30 June 2003	\$1,290,657,412
Nominal return on assets	8.85%
Inflation factor	1.70%
Real return on assets	7.03%

The real return achieved on investments for 2002-2003 was in excess of the 2.00 percent per annum that was identified as the requirement at 30 June 2002 to reach the June 2004 target balance. The strong performance of the return on the Land Fund's investments for the financial year has once again significantly reduced the on-going required real yield for the remainder of the Category A years to 30 June 2004.

At 2 July 2003, the revalued assets of the Land Fund totalled \$1,381,502,101 which included the 2003-2004 appropriation of \$91,982,000. The new target value of the Land Fund as at 30 June 2004 has been calculated as \$1,350,410,863; therefore the target has effectively already been achieved and has in fact been exceeded by approximately \$31 million.

While this excess in the target was the case on 2 July 2003, there still remains the potential for an actual shortfall by 30 June 2004 given the

possibility of unfavourable market conditions during the course of the 2003-2004 financial year.

The duration of the portfolio fell from 4.26 years at the beginning to 3.57 years at the end of the 2002-2003 financial year. This was primarily caused by a proportionate decrease in holdings of longer maturity Inflation-Linked Bonds (ILBs) and was considered an appropriate strategy given the reducing inflation risk due to the shortening horizon to the Fund's first target value at 30 June 2004.

The decision to reduce the split of ILB to Nominal investments in the portfolio from 70/30 to 60/40 was also taken partly due to the shortage of government issued ILBs. In the 2001-2002 financial year the issuance only covered approximately half the coupon payments from existing ILBs available for re-investment in the market and in May 2003 the Commonwealth Government suspended issuance indefinitely.

Investments during the year were made in securities prescribed by the FMA Act. These included Bank Accepted Commercial Bills, Bank Issued Negotiable Certificates of Deposit, Floating Rate Notes, Capital Indexed Bonds, Nominal Bonds and At Call Account.

During 2002-2003 the Fund benefited from capital gains from the bond holdings, as well as from a gain on shorter term ILBs. On the whole, the Fund's strategy continues to seek to balance the need to minimize the risk of a shortfall of the June 2004 target, against the prudent desire to limit the reinvestment risk (ie, the risk that maturing investments cannot be re-invested at sufficiently high yields), from that time forward.

As June 2004 approaches, notwithstanding that the Fund has benefited from more favourable market conditions to date than had been counted upon, this is becoming an increasingly challenging balance.

International investment consultants, Russell Investment Group (Russell) were again contracted during 2002-2003 to produce an updated analysis of the ability of the Land Fund to generate sufficiently strong real yields post July 2004 (Category B years) to allow the ILC to carry out its legislative agenda.

The resulting submission, addressing the identified shortcomings, was forwarded to the Minister for Finance and Administration on 4 October 2002. At the date of this report a response is still outstanding.

The Minister for Immigration, Multicultural and Indigenous Affairs was also informed of the matters raised in the above submission on the same date.

FORWARD INVESTMENT STRATEGY

The Consultative Forum agreed that 2003-2004 appropriation monies again be invested short due to the strong rally in real yields particularly in inflation linked bonds. This rally was due in part to the decision in mid May by the Commonwealth Government to suspend issuance indefinitely. Yields in this asset class also rallied further as a result of higher than expected CPI figures for the March quarter. The administrators of the Land Fund will take steps during 2003-2004 to lock in an appropriate proportion of the capital gains achieved in the past financial year and to strategically align the portfolio for any possible transition period after or near June 2004.

Russell have again been contracted for 2003-2004 to provide on-going advice on investments and will continue to carry out reviews of the Fund's performance on an ad-hoc and bi-annual basis.

INDIGENOUS LAND CORPORATION

The ILC is an independent statutory authority, separate from ATSIC, which will use the funds made available to it each year from the Land Fund. The ILC has responsibility for the acquisition and management of newly acquired Indigenous-held land and for existing Indigenous-held land in all states and territories.

The ILC and ATSIC have different responsibilities, roles and functions under the legislation. The ILC, as a distinct legal entity, has the obligation to separately report details of its administrative structure and processes under section 193K (1) of the ATSIC Act.

Whilst the ILC and ATSIC report separately, extensive consultation is carried out between the two bodies during the drafting of the Land Fund Account annual report to ensure all significant matters are reported in a coordinated manner.

Further details about the operation of the ILC and notes on the limitations its reporting responsibilities are available elsewhere in this Report.
